Design Experience

Product Design Flex
Thinkful, April 2020
Learned industry best practices and design process standards with a focus on UX Research, Visual Design, and Front-end development.
Created and deployed projects while learning new tools and frameworks by collaborating several hours every week with a senior product designer.

Cloud Storage Application Project
My goal was to take some of the best aspects of current cloud storage and organization applications and inject them with a sense of social networking. The finished project can be view here:

Mobile Transit Application Project
My goal was to create a user-friendly, minimalist re-design for a local transit app. Users were having trouble navigating current bus routes and understanding the arrival schedules.
The finished project can be viewed here:
